About Us.

Vision & Mission.

As a leading manufacturer of chemical innovations, we aim to provide global transportation with integrated systems and world-class service in sustainable surface care, cleaning and material protection.

We support the future development of our customers on-site with high-performance solutions and outstanding service, optimised to their needs, at competitive prices.

History.

In 1968, Hans Koch began to develop recipes for polishes in his garage. He was dissatisfied with the poor quality of the car care products of his time. As a trained carpenter, he had an extraordinary passion for finished surfaces and cultivated attention to detail. The resulting products were of outstanding quality and enthusiastically received by experts, the commercial customers.

In the following years, the company grows that sets new standards on the market with innovative concepts in the fields of washing chemicals, vehicle preparation, and industrial and workshop floor cleaning.

Through decades of continuous expansion of research and development, production and field service, Koch-Chemie (KCX) is now a leading supplier of cleaning and detailing products for the entire automotive sector and supplies to over 60 countries worldwide.

Excellence For Experts.

Well-known automotive manufacturers, such as Mercedes-Benz, BMW and VW, and independent institutes have tested our products and approved them for global application. The high quality of the products is proven in daily practical use in countless wash systems, car-washes, automotive factories, car dealerships, and industrial and commercial companies.
